

Getting Closer to Nature with Nature Identification Apps

Do you have smartphone or tablet that you can use to take photos of the plants and insects that you come across outside or record birdsong you hear? If you do, how about trying one of these apps to identify what you find and keep a record of your experiences on this sheet.

App		What did you or the person you care for like about the App?	What did you find out using the App? How did it make the person you care for feel? Did it encourage the person you care for to get outdoors or connect more with nature?
BirdNET Category: Available from:	Bird sound identifier (Free) Birds Google Play store only 		
Chirpomatic UK Category: Available from:	(iSpiny) Bird sound identifier (£3.99) Birds Google Play & Apple App stores
